Attachment 2. Consideration of Conservation Efforts When Making Findings for Listing Petitions

1. Effort already implemented?
   - Yes
   - No

2. Effort already implemented?
   - Yes
   - No

3. High level of certainty of implementation, based on PECE criteria?
   - Yes
   - No

4. High level of certainty of effectiveness so as to have reduced or eliminated a threat(s), based on PECE criteria?
   - Yes
   - No

5. Does not satisfy the PECE standard; cannot be considered as a basis for finding that listing is not warranted

6. Include as part of existing conditions considered in 5-factor analysis
   - Yes
   - No

7. Is listing warranted?
   - Yes
   - No

8. Finding is complete

9. If the initial 5-factor analysis indicates listing is warranted, then consider efforts that satisfy the PECE standard to determine the extent to which they have reduced or eliminated the threat(s) identified in the 5-factor analysis. Based on this, make one of the following findings:
   - (1) listing is not warranted (because the threat(s) has been eliminated or adequately reduced by these efforts);
   - (2) listing is warranted (despite these efforts).
